

Project Summary

Cleveland State University

Cleveland State University installed a 23mm Full Color LED Matrix Display in October 2009. The installation was the first in a series of upgrades scheduled for the Robert F. Busbey Natatorium. The display is capable of displaying live timing, animations, full color live video, and video replays.

The new display measures approximately 11 ft x 19 ft (3.3m x 5.9m). The University left its Colorado Time Systems' light-reflective scoreboard in place to display lane, place, and time for swimming. In addition to the new display, Cleveland State also acquired a System 6 Timing Console, which includes timing and scoring for swimming, diving, water polo, and synchronized swimming.

The 50m pool at the Robert F. Busbey Natatorium features:

- 23mm Full Color LED Matrix Display
- 4009 Light-Reflective Scoreboard
- System 6 Timing Console
- AquaGrip Touchpads
- Championship Start System
- Pace Clocks
